Hall 27

**THINK
WEINIG**

Think WEINIG
means

Active Networking.

With intelligent system solutions for maximum efficiency, superior quality and utmost security for the future.

For small shops and industry.

WEINIG OFFERS MORE

Welcome to LIGNA!

Whether small shop or industry: important challenges lie ahead in our sector. The WEINIG Group is perfectly prepared and able to support you with comprehensive consultancy and intelligent system solutions for maximum efficiency, superior quality and utmost security for the future.

In hall 27, over an area exceeding 3,000 m², the WEINIG and HOLZ-HER brands will showcase our unique all-round expertise as a technology and systems partner in solid wood and panel processing.

Visit us in Hanover, and experience more than 40 machines in action, meet with your WEINIG experts and gain valuable inspiration for your business. Discover the future – THINK WEINIG!

The whole world of wood processing – live

1 Cube Plus sweepstake / Winners Point

2 WEINIG Information

3 WEINIG Services
Service, pre-owned machines, finance, training

4 HOLZ-HER Information

5 HOLZ-HER software / CNC

NEW 6 Rip saw / longitudinal circular saw
FlexiRip 3200 + FlexiCut with Easy Stop
Ripping of planks and other materials

NEW 7 Cutting line / cross-cutting
Scanner EasyScan+ C: The intelligent scanner for profitable cross-cutting
Optimizing cross-cut saw OptiCut 260: Cross-cutting of finger-jointed parts and fixed lengths

NEW 8 Optimizing cross-cut saw with positioning pusher
OptiCut S 90 Speed
Cross-cutting of packs and individual parts at maximum speed

9 Rip saw / multi-blade rip saw **VarioRip 310 M**
Ripping of boards, glue joint cut

10 Band resaw **BKS**
Ripping of framing wood, profiles, etc.

11 Scanner **EasyScan+ C**
The intelligent scanner for profitable cross-cutting

NEW 12 Cutting system: Ripping
Scanner EasyScan RT: Innovative ripping optimization
Rip saw ProfiRip 450 M Speed: Ripping of boards, high-performance cutting

NEW 13 **ProfiPress T Next Generation** gluing press
A new dimension for the production of solid wood panels – more performance, more flexibility, more comfort

NEW 14 Cutting system: **Cutting Scanner CombiScan Evo C200:** The modular all-rounder of scanners
Optimizing cross-cut saw OptiCut 450 Quantum with VarioStroke: Optimal cross-cutting speed with maximum precision, feed speed up to 450 m/min

NEW 15 **OptiStat and OptiLink – “W4.0 presented in action”**
Scanners – cutting – optimization – finger-jointing (linked production line)

16 **Finger jointing line Turbo-S 1000 Capacity**
Vertical and horizontal finger-jointing for e.g. furniture panels, windows, doors, flooring, GlueEye Vision

17 **Double-end tenoner ProfiShape T4P**
End profiling of door frame elements and blank processing of MDF mouldings

NEW 18 **Splitting unit Powermat 2500 SP with feeding system**
Splitting of glued blocks with thin kerf saws

NEW 19 **Grinder Rondamat 985**
Package for fully automated grinding of finger jointing cutters

NEW 20 **Automatic planer and moulder Powermat 2400 with infeed and outfeed mechanization**
Industrial bead production with up to 100 m/min feed speed

21 **Automatic planer and moulder Powermat 700 Compact**
Profiling with maximum user-friendliness for standard applications

NEW 22 **Automatic planer and moulder Powermat 2400 3D**
3D structuring from above and contour milling from the left-hand side during throughfeed

23 **Automatic planer and moulder Powermat 1500 with EM100**
Profiling with optimal flexibility even with small batch sizes

24 **Tools exhibition**

25 **Sample profiles exhibition**

26 **Exhibition for Processing of Plastics and Composites (PPC)**

27 **Automatic planer Cube Plus**
Four-sided planing with no setup time

28 **Automatic planer and moulder Powermat 700 windows**
Planing of window scantlings and glazing bead profiling

29 **Automatic planer and moulder Powermat 1500 with mobile spindle**
Processing of random widths

NEW 30 **WEINIG System Plus**
Moulder Master software: Creation and management of profile and tool drawings

CNC grinder Rondamat 1000 CNC: Fully automatic grinding of profile knives using CAD data

OptiControl digital measurement bench: Measurement of tools via a camera system

31 **Profile grinder Rondamat 960**
Manual grinding of profile knives via templates

32 **Concept / Automation – presented in action**

33 **W4.0 digital – presented in action**

34 **Windows/ furniture / software – presented in action**

NEW 35 **Optimizing cross-cut saw with positioning pusher OptiCut S 50**
Cross-cutting of window scantlings, cutting of packs and individual parts

NEW 36 **Conturex C125 Vario**
Production of windows / facades / doors – furniture and frame construction

NEW 37 **UniPin 200**
Dowel insertion and window sill gluing

38 **Multirex 7225 Window**
Production of windows / facades / doors – furniture and frame construction

NEW 39 **Gluing press ProfiPress L B**
Pressing of window scantlings up to 160 mm

NEW 40 **Vertical circular panel saw Sector 1255 pro**
Cutting of multilayer panel materials

41 **Pressure beam saw, panel saw Tectra 6120 power with Store-Master 5110**
Handling and splitting of panel materials

NEW 42 **Nesting processing center Dynestic 7532**
High-speed nesting for high material throughput

43 **5-axis CNC processing center Pro-Master 7225**
High-performance 5-axis CNC processing

NEW 44 **Nesting processing center Nextec 7707**
Intelligent panel handling of the future

NEW 45 **Edge bander Lumina Industry 1596**
With industrial PUR glue application and processing of laser edging

46 **Vertical CNC processing center Evolution 7402**
Drilling and milling of panel materials

47 **Vertical CNC processing center Evolution 7405 Connect**
Universal CNC processing of panel materials

48 **Edge bander Lumina 1380**
With glue application and processing of laser edging

49 **Edge bander Sprint 1329 premium**
Automatic edge banding machine with zero glue joint

50 **Edge bander Streamer 1057**
Edge bander with zero glue joint

51 **Edge bander Auriga 1308XL**
Automatic edge bander with zero glue joint
